

Winter Weather Checklist

- Clean out gutters and downspouts.
- Properly winterize vacant and unoccupied buildings.
- Trim overhanging tree limbs from over buildings and fencing.
- Think safety when using space heaters. NEVER plug in heaters to extension cords or power strips.
- Insulate water pipes on exterior walls and in attics.
- Maintain a level of heat in sprinklered buildings.
- Blow out irrigation systems to minimize the chance of frozen lines.
- When freezing temperatures are forecast, make sure water faucets are turned on to a trickle.
- Lower net backstops at ballfields to reduce the risk of damage from frozen rain.
